

Julie's Tarot Reading

Tarot reading advice

Why does your reading makes no sense?

Tarot isn't always easy, however just because we aren't always meant to hold all the answers doesn't mean that we have to give up when we get stumped on a tricky Tarot reading.

In fact, there are very common reasons why your Tarot reading may appear to make no sense at first glance. If you find yourself either confused or drawing a blank in a reading, you may find the answer here!

1. The Spread is a Mismatch

Many factors go into creating an effective Tarot reading & one of the most obvious & an underrated piece of this is the *Tarot spread*. The spread creates the foundation & bones of a reading & can significantly shape of where you ultimately take the reading.

As a result of using a spread that doesn't really work for your question, you may limit your scope in reaching too far, depending on your objective.

Solution: Consider more Tarot spread research

At times, a creative or far-reaching Tarot spread may be what you need for the topic at hand. At other times, it may be a very simple *3-card spread* that does the trick or maybe the chosen spread is complicating the situation altogether.

If your Tarot reading is failing to make sense, consider choosing another spread & take the time to dig deeper to find a more appropriate one.

2. It Does Make Sense... Later!

At times, Tarot communicates to us in a seemingly incomprehensible ways. It is possible that you aren't experiencing a lack of communication between you & your cards, but rather a misunderstanding in when the message is meant for. Your Tarot reading may be trying to advise future you, rather than present-day you.

Solution: Practice patience, and step away from the cards

The simple solution here is to write down the details of your reading as objectively as possible & come back to it at a later time. Just know that even if the messages seemed irrelevant or useless to you in the present, your Tarot reading may actually be a diamond in the rough & your saving grace a little later down the line.

3. You're stuck in Traditional Boxes

When you are at the beginning of learning Tarot, it's natural to try to memorize key symbols, keywords, phrases & images that help you remember the meaning of each card. However, as you continue with your Tarot journey, it helps to let your intuition run more of the show rather than rattle off something by memory.

You are more likely to want more specific, detailed & personal interpretations than something you learned in a book, so a set of keywords may be tying you down if you've been on the Tarot reading road for a while.

Julie's Tarot Reading

Tarot reading advice

Solution: Creative writing, research & meditation

Get creative with your Tarot study & think outside of the box. Expand upon your tools & skills, trust your intuition & try new things...

4. The Question is Confusing

Much like a Tarot spread, the question that you pose to the cards & how you phrase it can be an easily overlooked, but extremely essential, key to the success of your reading.

It's possible that your intention is in the right place, but the framing of your question is muddled which leaves room for multiple interpretations or the reading is being guided in a direction that you ultimately don't want.

Solution: Rethink the question

You may have to completely rework or reconsider your question. There are ways to rework your question; for example., writing it out & tweaking pieces of the wording to understand the key to asking an effective Tarot question is all the more important.

5. You Aren't Meant to Know the Answers

Sometimes, the reason what we don't understand our Tarot readings is the simplest one **we aren't meant to know** or the answer isn't meant to be known at this time but whatever the reason your Tarot deck has decided that you're not meant to see its secrets at this time so it may be best to trust its judgment.

Solution: Reflection & meditation

This insight can be a little frustrating & disappointing... but it is probably for the best.

We can always consider with some honest self-reflection why we may not be ready to receive an answer to our particular question but this may open up a window to some important insights on its own. With some increased self-awareness you may find that in the end you won't need to consult the cards at all!

Remember that ultimately Tarot isn't the only tool out there to help you with your questions, problems or life dilemmas. Trust your intuition & an abundance of different divination tools gifted from the Universe at your disposal, not even a confusing Tarot spread can stand in your way.

Authors note

So thanks for taking the time to read this blog & I hope you found it helpful, when a reading is sometimes tricky. I will be posting more blogs soon.
